

Primary Ciliary Dyskinesia (Kartagener syndrome, ICS)

Call for collaboration

- This long-term project (since 1994) seeks to identify and characterize genes involved in PCD
- Sporadic as well as familial cases are sought for this multi-center collaborative study
- **Needed for participation in the project:**
 - clinically well-characterized patients (ideally including electron microscopic analysis of cilia)
 - blood samples from affected individuals; if possible, samples from parents (even for sporadic cases)
 - your help, to keep patients informed of progress
